Norb Wroblewski, Director of Sales
Gordon J. Sindlinger, Secretary, Material Manager

COMPANY DESCRIPTION:

Controlled Molding, Inc. is headquartered in Hadley, PA, just north of Pittsburgh. In addition to offering a full range of custom molding services (with 90 to 550 ton injection molding presses), they are a pre-eminent designer and manufacturer of specialty dispensing closures and containers for dry goods. Their recent investments in new equipment and manufacturing facilities plus CAD design enhancements enable them to meet the needs of nearly any company needing a one-stop resource.

MARKETS SERVED:

In **custom molding**, any manufacturer in any type of industry needing design, mold-building and injection molding services requiring production on presses ranging in size from 90 to 550 tons.

In **packaging**, any manufacturer and distributor of dry goods such as confectionery products, spices, personal care products, household goods, pet products and cosmetics, among others. Has proprietary line of dispensing closures, but will design new ones for unique or special needs. Combines these with ability to design and manufacture plastic containers as a single-source packaging design and manufacturing services.

PRODUCTS:

Custom molder offerings manufacturers a one-stop injection molding service for the design and manufacture of any plastic product molded out of any standard or engineering resin or compounds.

Include the design and manufacture of custom and a full range of dispensing closures and containers for dry goods needed to be dispensed in pellet, powder or granular form. Leader in composite can closures offering industry acclaimed lines of dispensing closures sold under the Dispenz-R-Top, Sift-Resist-R and Flipper trade names. Innovator of total packages for polymer container including design and manufacture of dispensing closures and plastic containers.

PRODUCTION QUALIFICATIONS AND EQUIPMENT:

CMI is certified TS 16949:2002/ISO 9001:2000 and has a Class 100,000 medical clean room. FDA Registered. GMP Compliant.

Complete “art-to-part” CAD design, mold building, custom molding (14 IM presses from 90 to 550 tons), assembly and automation (contract manufacturing and packaging) systems. Operates 24/7, 365 days in a modern 38,000 square foot facility including recent addition of new production facilities. Can mold all commodity and nearly all engineering thermoplastic compounds and resins.

UNIQUE SELLING PROPOSITION

Features industry’s most comprehensive CAD engineering software and services to provide customers with standard or unique finished container/closure product design services (including closure, container and graphics) in hours, to enable art-to-part production in days or weeks. Firm prides itself on providing all the skills and resources of larger firm, but the service, quality and delivery of a dedicated smaller firm.
